

ASSET EARTH

People and their Environment

New 2008 Asset Earth Series

Join us for lively discussions and free refreshments!

Global Climate Change and the IPCC

Thursday, February 21, 2008, 7-9 p.m., Auditorium, Sugar Grove Campus

This presentation will summarize the major points of the recently-issued Intergovernmental Panel on Climate Change (IPCC), Fourth Assessment Report.

Join Waubonsee instructor and trained geologist, Dave Voorhees, as he discusses data, observations, causes and impacts of climate change in reports that confirm sensitivity of the Earth's climate to greenhouse gas emissions.

Waterworld: Global Oceans, Ice and Climate Change

Thursday, April 17, 2008, 7-9 p.m., Auditorium, Sugar Grove Campus

Join Dr. Paul Loubere, Professor, Presidential Research Professor, Northern Illinois University, as he discusses the role of the world's oceans and glaciers in the ongoing global climate change.

Slowing Climate Change: Our Responsibility, Our Options

Thursday, May 1, 2008, 7-9 p.m., Auditorium, Sugar Grove Campus

Dr. David Goldblum, Assistant Professor Geography, Northern Illinois University will explore options we have to reduce the pace and magnitude of climate change, as well as to minimize our vulnerability.

Dr. Goldblum's research interests focus generally on both naturally-occurring and anthropogenic impacts on plant communities.
