

MBA Preparation Certification of Achievement

This certificate provides the student who has already earned a baccalaureate or higher degree in an area other than business from an accredited education institution the core business courses required of many graduate business programs. The curriculum also provides a business skill set to those with a liberal arts education that may be working in a business environment.

Note: Please check with the graduate business program you wish to attend to learn of their waiver policy requirements. This certificate will provide a core of business courses to build upon and may reduce the number of courses you need to take in a graduate business program. Completing this certificate does not imply a guarantee of a favorable admission decision to a graduate business program.
