Part Three: Documentation of Income Status

All information received is for Student Support Services use only, and will be strictly confidential. If student is under 24 years of age, any documentation must be from the parents unless the student is a veteran or has been deemed independent by the financial aid office.

Student Support Services is a federally funded program. A certain percentage of our participants must be from low-income homes. By program regulations therefore, we ask everyone to provide documentation so that we may determine whether they qualify as low income.

A copy of your or your parents’ 2009 taxes is preferred; however, if it is your preference, the form below may be used as long as you or your parents’ signature is witnessed by a notary public.
